

# CASES UTILITY LOCATING

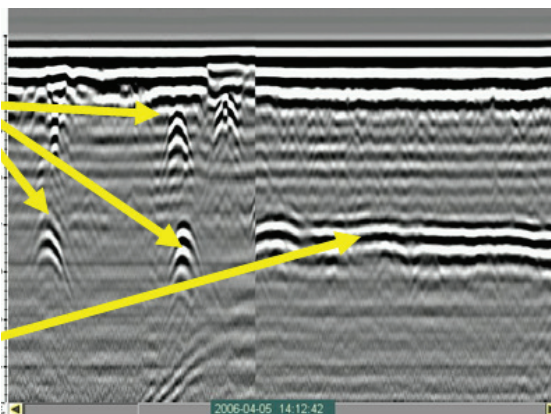

## | Ground Penetrating Radar (GPR) |

### ► Utility Locating examples

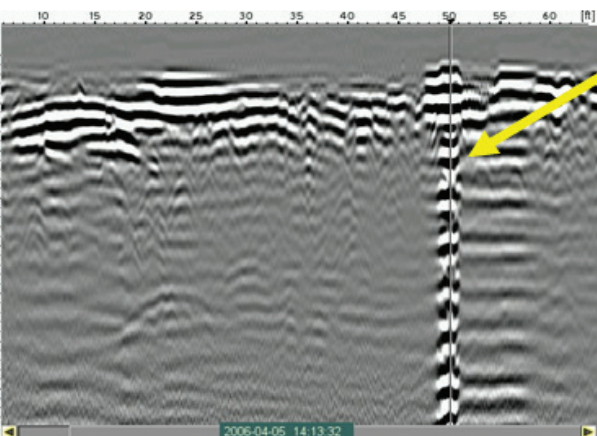

Back-up cursor centered over detected utility from backing up GPR system perpendicular to pipe. Target marked at midpoint of transducer on the ground surface.

Multiple utility targets  
GPR transducer moved perpendicular to pipe

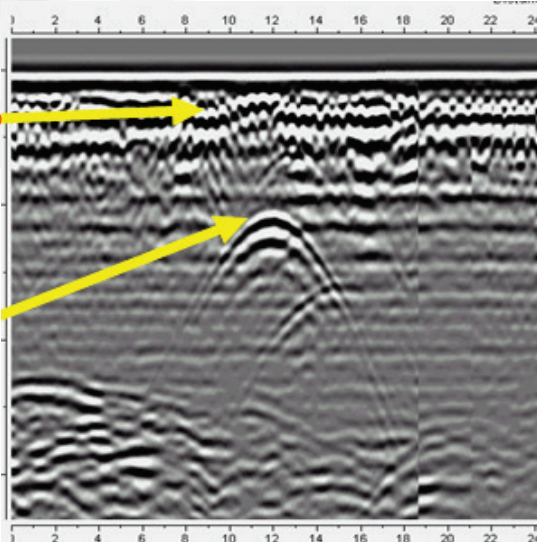

Pipe reflection from traversing GPR transducer along the pipe

"Ring down" response from near surface buried metal object such as manhole cover or catch basin grate either on the surface or buried shallow under asphalt

Concrete slab cover with rebar targets (small hyperbolas)

6" plastic water line
